Introduction to Generative AI and Its Applications

Lecture 1a

Course Introduction | Edward Szeto

Course Information

☐ Time & Venue

- **Lecture**

- Fri, 3:30pm – 6:20pm

- (HHBMM101, PolyU Hung Hom Bay Campus)

☐ Learning Mode

- Face-to-face

Teaching Team

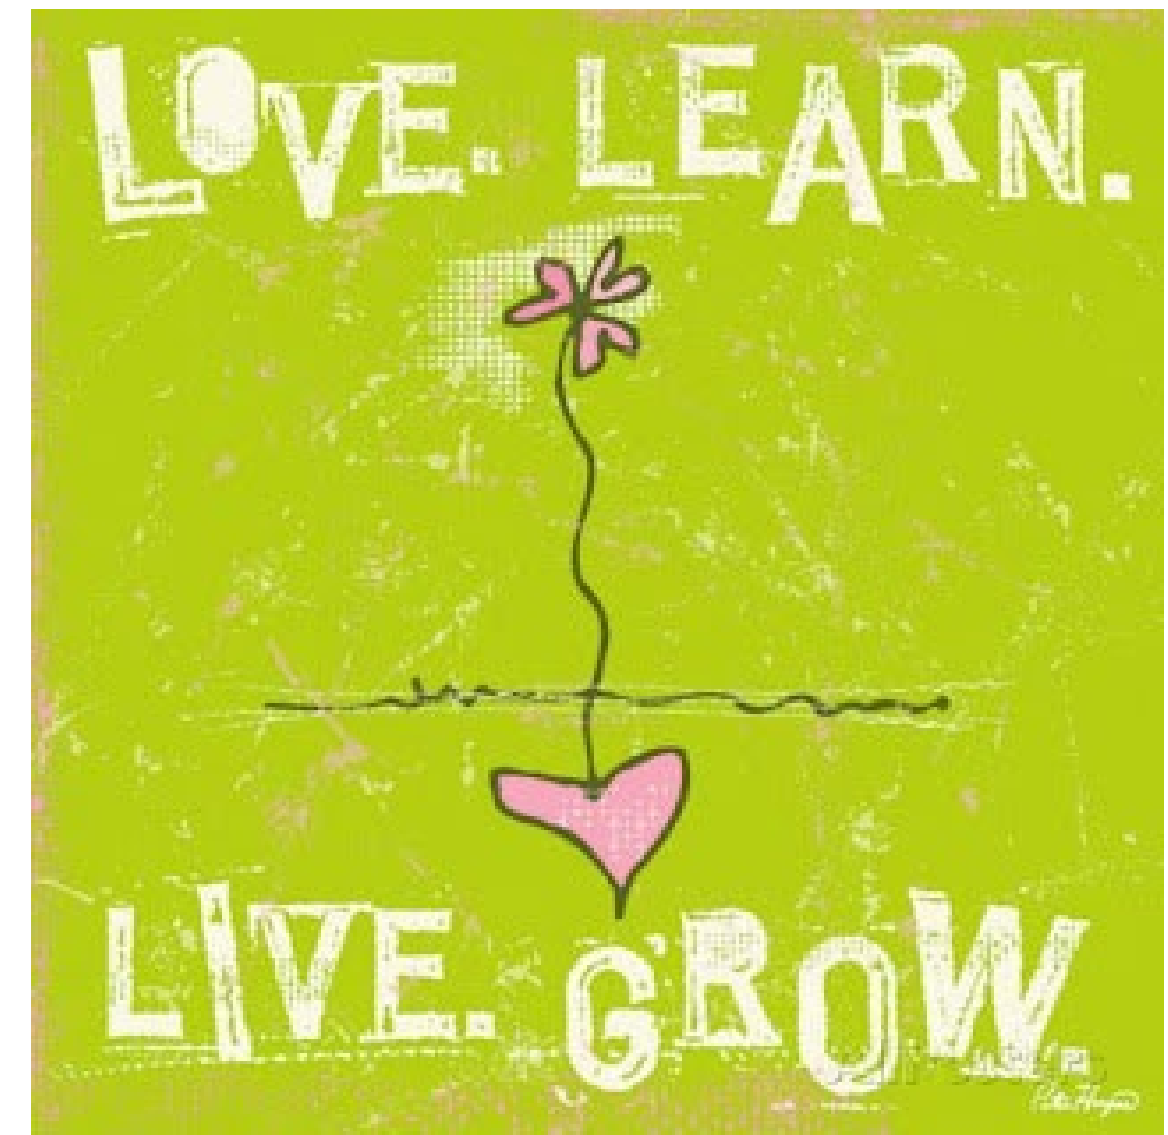

□ Lecturer

- SZETO, Edward
(Email: edward.szeto@polyu.edu.hk)

Message from Instructor

- Learn as much as you can
- Feel free to ask any questions
- Have fun and enjoy

Message from Students

- Background of using Generative AI tools?
- Expectations from the course?
- Any suggestions to the teaching team?

Course Objectives

- Understand the nature and development of GenAI
- Encourage innovative research methods through GenAI
- Apply Generative AI across diverse disciplines
- Critically evaluate ethical and societal impacts of GenAI

Learning Outcome

- Demonstrate an understanding of the foundational concepts of GenAI
- Acquire practical skills in using GenAI technologies
- Demonstrate an awareness of ethics issues and the impact of GenAI applications in daily life.

Assessments

Assessment Item	Weight
Exercises and assignments	15%
In-class quizzes	10%
Essay	15%
